

LOXX key

Contactless key tags

This contactless key fob looks like a real key. It contains of two parts, the key and the casing. Behind the solid casing the transponder is very well protected and secure. This two-part configuration guarantees a long life cycle. By using a transparent casing each company logo can be printed with the help of tampon printing behind glass. The casing itself can also be laser-engraved with company logo or numbering depending on the customer's requirements.
