

LOXX I

Contactless RFID label

The RFID labels, so-called smart labels or smart tags, are ultra-flat transponders. This selfadhesive ID media is paper-thin and very flexibel. It may be stuck on any location where transponder technology is to be employed.

FIELDS OF APPLICATION

- Temporarily
- Supplement to existing ID media
- Offline systems
- Logistics
- Warehousing / identification of merchandise
- Libraries, lending of books, etc.

ADVANTAGES

- High security level
- Good reading distance
- Easy to use (remove and paste)
- Segmentation permits different applications (multifunctional security)
- Multi-purpose
- High flexibility

DETAILS

- Basic color: white
- Labeling:
Printing of company logo or numbering etc. possible
