

RFID WRISTBANDS

Contactless wristbands for fitness and events

IDENTA

IDENTA AUSWEISSYSTEME GMBH

Contactless RFID wristbands are commonly used for access control, time record and visitor identification in swimming pools, wellness facilities, fitness clubs and events because of their high level of wearing comfort. It is possible to activate the encoded RFID wristbands for defined running times. Likewise assigned locker numbers can ease the handling of cupboards and wardrobes. Moreover payments in restaurants, bars or vending machines can be made via RFID wristbands. Other separate areas, e.g. sauna or outdoor areas can be unlocked and when checking out the utilization period of the RFID wristband can be read out.

MODEL LOXX W

- robust, versatile applicable for sport, fitness, sauna, swimming pool, wellness, outdoor
- housing round (Ø 31 mm) made of impact-resistant polycarbonate in the colors: blue, red and black (other colors by request)
