

IDENTACard

Contactless ID-cards

The IDENTACard is a credit card sized ID-card featuring contactless reading. The card works passively, i.e. no battery needs to be inserted in the card.

VERSIONS

LEGIC®, Mifare®, Hitag™, EM, etc.

- Standard glossy-white or mat
- Customized design on top and bottom face, by silk-screen, offset or digital print

LAYOUT

The card layout is customized to your wishes and requirements.

- Text, numbering or personalization, with or without photo, via digital print
- Customer design on top and bottom face possible, by silk-screen, offset or digital print
- Signature field

Digital submission of personal data, photos and company logo (Excel or Access, bmp, tiff, jpeg).

POSSIBLE COMBINATIONS WITH OTHER TECHNOLOGIES

- Magnetic stripe LOCO/HICO
- Inductive 65 Bit (LEGIC/Mifare)
- Barcode
- Contact chip
- Other RFID-Technologies

ADVANTAGES

- High security level
- Reading independent of position
- Easy to use
- Segmentation permits different applications (multifunctional security)
- Rapid data transfer
- Good customer bond
- Strong publicity effect
